IS F341 - Software Engineering
LAB01 – Preparing and analyzing AS-IS WSSS for ACL's Sales work system

Set up (5-10 minutes)
1. M1 (i.e., the first member of each group) makes a copy of the solution template (Google Doc) and shares it with the other group members (M2, M3, ...) for editing
2. After all the members have joined, M1 presents the first page of the shared template and all other group members open it in a different browser window for collaborative editing.

Part A: (40-50 minutes)
3. Group members start discussing various aspects of the WSSS to be prepared and edit the shared solution template
4. Group members verify the consistency of various elements within the WSSS and make any final changes required to be made

Part B: (30-40 minutes)
5. Group members identify role(s) and associated problems/challenges related to the sales work system in the current environment.
6. Group members discuss and enter these details into the table on page 3 of the shared solution template.

Submission:
7. M1 submits the group solution (i.e., the shared document) against the LAB01 assignment on Google Classroom on or before the deadline.

Note: Do not turn off or clear version history in your group solution document.
